

NH360 FOR COLD STORAGE

WHY YOUR PROJECT NEEDS AN NH360 PACKAGE

With nearly 35 years of experience, Stellar is an industry leader in industrial refrigeration from food processing plants to cold storage and recreational facilities. We offer the most comprehensive range of refrigeration packages available. Specially designed units for cold storage applications offer numerous advantages. Manufactured in a controlled and clean environment, project lead times and upfront costs can be reduced. Technological improvement and standardization reduces overall operating costs for the life of the equipment.

LOWER COST OF OPERATION

NH360 packages reduce ongoing costs for the life of the equipment. Utilizing a more efficient design saves power and water consumption costs. Standardized product offerings reduce the complexity of maintenance and PSM (if required). Combining NH360 packages with the NH360 software provides PSM, training and asset management online.

No or Low Water Consumption

Reduced Energy Costs

No or Low PSM Costs

VERSATILITY

No matter your preference, NH360 packages can be customized to fit your project requirements. With Stellar's experience in design you can take advantage of our knowledge and implement custom configurations into your final solution.

Low charge Ammonia

Low GWP synthetic refrigerants including Opteon™

Designed to Accommodate Multiple Configurations

FACTORY-BUILT

NH360 package quality is ensured by use of proven industrial-grade components assembled with a rigorous quality control program inside a factory environment.
